

CONSERVATION MEASURE 78/XIV
Precautionary Catch Limits on *Champscephalus gunnari*
and *Dissostichus eleginoides* in Statistical Division 58.5.2

1. In accordance with the management advice of the 1994 meeting of the Scientific Committee:
 - (i) a precautionary TAC of 311 tonnes in any one season shall be set for *Champscephalus gunnari* in Division 58.5.2; and
 - (ii) a precautionary TAC of 297 tonnes in any one season shall be set for *Dissostichus eleginoides* in Division 58.5.2.

These TACs may only be taken by trawling.

2. If, in the course of a directed fishery for *Dissostichus eleginoides* or *Champscephalus gunnari*, the by-catch in any haul of any of the species *Lepidonotothen squamifrons*, *Notothenia rossii*, *Channichthys rhinoceratus* or *Bathyraja* spp. exceeds 5%, the fishing vessel shall move to another fishing location not closer than 5 n miles distant¹. The fishing vessel shall not fish within 5 n miles of the location in which the by-catch exceeded 5%, for a period of at least five days².
3. The Ten-day Catch and Effort Reporting System set out in Conservation Measure 61/XII and the Monthly Effort and Biological Data Reporting System set out in Conservation Measure 52/XI shall apply.
4. The fishing season shall commence in each year at the close of the annual meeting of the Commission and shall continue until the respective precautionary catch limits are reached, or until 30 June, whichever comes first.
5. The catch limits shall be kept under review by the Commission, taking into account the advice of the Scientific Committee.

¹ This provision is adopted pending the adoption of a more appropriate definition of a fishing ground by the Commission.

² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 51/XII, pending the adoption of a more appropriate period by the Commission.
